My temptation is coming from my heart
That skips a bit just like a game
Everytime you call my name, call my name

Its only you
I want you too
Its only you
I want you too
Come

Do you see what I mean talking bout fever
The fire burns inside of me
And you can quench me easily, so....
Let me hold you and squeeze you like a fool
Because I'm crazy about you
When you sit down and cross your legs, cross your legs

Temptation
Temptation...
Come

Youre sweeping away without a reason
Unless someone else is loving you
Id want to have you by my side, by my side

Temptation
Temptation...

Its only you...
I want you too!
Its only you .
I want you too!

My temptation is coming from my heart
That skips a bit just like a game
Everytime you call my name, call my name

Temptation
Temptation...
