"Down With The Ship"

Visit "[Down With The Ship](#)" on MotoLyrics.com

If my life was a distance what mile would you claim
And if my life was a story how I wish you would explain
all this

If you leave me I will go down with the ship
Your love breaks me right in 2
Still that part of you that just won't quit

If your voice was a siren with nothing left to sing
Oh
Down below broken skylines I'm still here listening to
this

If you leave me I will go down with the ship
Your love breaks me right in 2
Still that part of you that just won't quit
I've been here under for the longest time
I'm your restless child over state lines
So don't you let me down for once in your life

We're a growing now faster than our skin
Looking for our fathers
So where have you been
Don't you let us down for once in your life
For once in your life

If you leave me I will go down with the ship
Your love breaks me right in 2
Still that part of you

If you leave me I will go down with the ship
Your love breaks me right in 2
Still that part of you that just won't quit
