I'm 10, 000 miles from you  
My sky is black when yours is blue  
You just steal my broken faith and put it back together  
Yyou're cheating on the weather with me  
I sing a song I wrote for you  
A 100 melodies so blue  
Will you be my stolen rain that washed it all together  
I love you like a fever gone cold

I'm singing in my sleep  
Driving across Texas with you  
And you look so good

I'm singing in my sleep  
Driving across Texas with you  
And you look so good

I could stay another day with you  
Stall winter's pain 'til June  
Will it stay the same  
Will winter be in summer  
I'm already getting older with you

I'm singing in my sleep  
Driving across Texas with you  
And you look so good

I'm singing in my sleep  
Driving across Texas with you  
And you look so good
