Are we comin on to strong
Lyrics to bold to sing along
We've been around way to long to back down
Put us down for what were fighting for
Brush the dirt off well come back for more
Never waiving what we say well hold our ground

We found somethin worth livin for
Hes dropped the bomb he's settled the score
Its just a matter of time till the worlds knee will bow
Fight to the death and well rise above
Saw through the lies and the systems corrupt
Take that white flag and then well burn it to the ground

Raise the white flag and lay our arms down? - NO
SURRENDER
Comin out with a bang a guns a blazin - IN YOUR FACE

Back to back dodgin bullets again
The duels on there's no countin to 10
Whose gunna be the first to draw
Last man standing and the first to fall
