Who scared you? Why were you born, my babe?  
In two-time's arms with all of your charms, my love  
Why were you born, just to play with me  
To freak out or to be beautiful, my dear?

Load your head, blow it up, feeling good, baby  
Load your head, blow it up, feeling good, baby, ah

Well, my room is so cold, you know you don't have to  
go, my babe  
And if you warm it up right, I'm gonna love you tonight,  
my love  
Well, I'm glad that we came, I hope you're feeling the  
same  
Who scared you and why were you born?

Please stay  
I see your rider coming down the road  
Got a burden, carrying a heavy load  
One sack of silver and one bag of gold
