

The Dreams

"United We Fall"

Visit "[United We Fall](#)" on MotoLyrics.com

Don't ever be afraid to keep your dreams
Hope up and alive
You gotta believe in me
You gotta believe what I say
I've never seen you looking so sad
As when you when you look in the mirror
I see myself in you
I know what you're going through

Just take a deep breath
And we'll start again
I'll always be there for you,
My best friend
Let's start again
Let's start again

You've got a great life
But it's not enough
You want something more
That you haven't got
Let's start again
Let's start again

Life is sakin
Life is sakin

United we stand, united we fall
Don't ever be afraid to keep your dreams
Fired up and alive
United we stand, united we fall
Come on and take my hand
Let's reach up for the sky

Let me show you that the world can be
Something you and I can admire
We can build an empire
Let's build an empire
Fuck, I know it's all been said before
Teach me how to fight
So I can win your war
Let's start again

United we stand, united we fall
Don't ever be afraid to keep your dreams
Fired up and alive
United we stand, united we fall
Come on and take my hand
Let's reach up for the sky

I've never seen you looking so sad
As when you look in the mirror
I can see myself in you
I know what you're going through
I know what you're going through
I know what you're going through
I know what you're going through
I know

United we stand, united we fall
Don't ever be afraid to keep your dreams
Fired up and alive
United we stand, united we fall
Come on and take my hand
Let's reach up for the sky

Everybody needs a dream to hold on
Everybody needs to be strong, stay strong
Everybody needs a dream to hold on
Everybody needs to be strong, stay strong
Everybody needs a dream to hold on
Everybody needs to be strong, stay strong
Everybody needs a dream to hold on
Everybody needs to be strong, stay strong
