So nevermind the reasons
It's all about the leaving
I wish that i had know
I wish that i had acted
And if you ever find out why
We can't say goodbye

Don't forget me,
After summer we won't have that long
Always remember
In december the world's in song

So nevermind the leaving
I guess it's all about believeing
We'll clasp hands before i go
Maybe something more
But whatever is said,
We'll be glad that we did
Before we lose something
We'll go watch the shore again

Don't forget me,
After summer we won't have that long
Always remember
In december the world's in song

Having you here holding your hands
I already miss you
Having you hear visiting plans
I already miss you
And if you ever find out why
We can't say goodbye
Having you here, holding your hand
I already miss you
