I just found your letter  
I feel your sadness worlds apart  
And no words can say  
"I'm sorry"  
You're everything that matters  
And forever I'll know that  
If you call my name  
I'll follow  
In all my life  
No one so real  
Untainted love  
With you I can ascend  
I'll go with you  
I go with you  
I won't look back  
I won't look back  
I won't look back  
I won't look back  
I won't look back  
So don't look back  
I won't look back  
I can call you love  
You can call me lover  
You can call me love  
I can call you lover  
Let me call you love  
Won't you call me lover  
Won't you please say "love"  
I'll love you forever  
Hold out my hand  
I call your name  
Please take me there  
No, I will not look back  
I go with you  
I go with you  
I go with you  
I'll grow with you  
I go with you  
I go with you
