Oh Oh Oh Oh
Hush it's not safe to talk
That terminal could be switched on
The IBMs could monitor
And flag the things we say

Make sure you keep your cover up
And cover up your TV
When you call me
And make sure you watch your TV every day

And take nothing for granted
It's a war always remember
It's like holding back the ocean
Trying to hold onto your mind

Don't forget the reason
Why you started in the first place
It's a struggle like no other for the fate of humankind

[repeat]

And take nothing for granted
It's a war always remember
It's like holding back the ocean
Trying to hold onto your mind

Don't forget the reason
Why you started in the first place
It's a struggle like no other for the fate of humankind

The fate of humankind
[x4]
