

## **The Eternal Suffering**

### **"All These Governors"**

Visit "[All These Governors](#)" on MotoLyrics.com

(Generally I don't speak I'll of the dead however I might make an exception in this case)

When things should work but don't work  
When things should work  
When things should work but don't work  
When things should  
When things should work but don't work that's the work  
of all these governors  
Interference by decree that's the work of all these  
governors  
They block they block they block that's the work of all  
these goverenors  
When things should work but don't work that's the work  
of all these govornors  
He pulls it up the air with your information panels that  
form the southern combination  
Shut up shut up shut up shut up shut up shut up  
Anually reveiw and a cup on every corner hand out  
rewards for snitching on a formers  
Shut up shut up shut up shut up  
When things should work but don't work that's the work  
of all these governors  
When things should work but don't work that's the work  
of all these governors  
They're always looking after me  
That's the work of all these governors  
They walk but never for the distance  
That's the work of all these governors  
When thigns should work but don't work that's the work  
of all these governors  
That's the work of all these governors  
While we're down on all fours let's scratch their named  
into the floor  
So we wont wait we wont wait for all these governors  
So we wont wait we wont wait for all these governors  
So we wont wait we can't wait for all you governors
