"All These Governors"

Visit "[All These Governors](#)" on MotoLyrics.com

(Generally I don't speak I'll of the dead however I might make an exception in this case)

When things should work but don't work
When things should work
When things should work but don't work
When things should
When things should work but don't work that's the work
of all these governors
Interference by decree that's the work of all these
governors
They block they block they block that's the work of all
these goverenors
When things should work but don't work that's the work
of all these governors
He pulls it up the air with your information panels that
form the southern combination
Shut up shut up shut up shut up shut up shut up
Anually reveiw and a cup on every corner hand out
rewards for snitching on a formers
Shut up shut up shut up shut up
When things should work but don't work that's the work
of all these governors
When things should work but don't work that's the work
of all these governors
They're always looking after me
That's the work of all these governors
They walk but never for the distance
That's the work of all these governors
When thigns should work but don't work that's the work
of all these governors
That's the work of all these governors
While we're down on all fours let's scratch their named
into the floor
So we wont wait we wont wait for all these governors
So we wont wait we wont wait for all these governors
So we wont wait we can't wait for all you governors
