### "Eventually"

this street is an exit only  
it's an opening  
which explains why this shit washes away  
then runs right back in

if you have to always be leaving  
how am i gonna show you that we are free

arrange yourself  
reorder again  
nothing has changed  
select inspect and pull it apart  
all the flavors taste plain

if i can't find you through all your things  
how am i gonna show you that we are free  
if i can't find you through all your things  
how am i gonna show you that we are free

trace translate these names  
they're all the same  
no one isn't only  
six billion monkeys  
if we cannot need where would we begin  
how am i gonna show you that we are free  
if we cannot need where would we begin  
how am i gonna show you that we are free  
if you always have to leave  
if you always have to leave  
if you always have to leave
