Speak up  
If you think that is worth fighting for  
Is it all about the love lust  
Or is it all about the way we trust  
Wish it all away  
Or will you fucking stay

Piece by piece  
We'll all fall apart  
We never thought that wed have this doubt  
Everything used to be  
So clear but now we all live in fear  
And if I die before I wake  
Will you just crumble and break  
I'll take you with me  
In my heart because I know  
We just can't be apart

Speak up  
If you think that is worth fighting for  
Is it all about the love lust  
Or is it all about the way we trust  
One day you'll realize  
That love just don't live in the past  
Wish it all away  
Or will you fucking stay
