Wendy is in love with him
She's gone, she's gone

Forced myself out of bed this morning
When I woke up I could see wet garden
There's a thing called happiness
And there's a thing that people call denial

I think it's gonna rain here
I hope it's gonna rain here
Just before the pain sets in.

Turned my head to want something different
Hope she wakes up and finds something missing
If there's a chance for some reunion
If there's a chance you know just where I'll be.
