What's the obsession it's this I was sure a chemical
dependence we'll take care of it we'll take care of it
clinical depression we've got your prescription
what's the addiction your prediction you need
medication to turn it off turn it on turn it off turn it on
turn it off turn it on you're self deprecating you need
help medicating a psychotropical haze a metabolic
maze this is it this is it this is it this is it shoot
shoot on the radio what's the obsession it's this I
was sure a chemical dependence we'll take care of it
we'll take care of it a clinical depression we've got
your prescription what's the addiction your prediction
this is the one this is the one this is the one this is the
one this is the one this is the one shoot shoot on the
radio let's live for each other no eyes for another
let's give away all our friends and forget them mouth
to mouth suffocation lock the house lock ourselves in
close your eyes pick up the receiver don't set it down
until you hear that sound... I need you more than this I
need you more than this I need you more than this I
need you more than this I need you more than this I
need you more than this shoot shoot on the radio.
