Her love is keen
It stays the course
She seems to know my pressure points
When it hurts, it's understood
She plays a part in the things I do
But many times I reach for her
She comes alive with every word
Many nights I sit alone
And what I feel, what I want
She won't let it show

Oh won't you stay the night? Woah
We'll be happy together
Oh won't you stay the night? Woah
We'll be happy together
Oh won't you stay the night? Woah
Don't wanna be alone

But all the time I crave for her
Not only love, it's a jealous trust
I try to change my attitude
I lose control in the things I do
Many times I reach for her
I feel the life in every word
And many times I sit alone
What I need, what I want, she already knows

Oh won't you stay the night? Woah
We'll be happy together
Oh won't you stay the night? Woah
We'll be happy together
Oh won't you stay the night? Woah
Don't wanna be alone

Oh won't you stay the night? Woah
We'll be happy together
Oh won't you stay the night? Woah
We'll be happy together
Oh won't you stay the night? Woah
Don't wanna be alone.
