

The Five Stairsteps "America/Standing"

Visit "[America/Standing](#)" on MotoLyrics.com

America, where are you now
Don't you care about your sons and daughters
America, we need you now
To help us fight against
A dirty monster

America, where are you now
Don't you care about your sons and daughters
America, we need you now
To help us fight against
A guilty monster

Dirty water down?
And it filled the air?
Oh yeah, ? is standing there, ?
While the others try not to care

The? will be calling me
Sweet child, ?
I get so tired, let's put some love in it
Don't rob the children?

I said, America, where are you now
Don't you care about your sons and daughters
America, we need you now
To help us fight against
A dirty monster

America, where are you now
America, we need you now
America, America, America
America, America, America
America, America, America
