

The Foreshadowing

"No Other Arms, No Other Lips"

Visit "[No Other Arms, No Other Lips](#)" on MotoLyrics.com

No other arms no other lips no other love beside me
No other star up above to guide me

We've had our stormy weather We've had our sunshine
too
We've shared them both together and I'm still here with
you

Sometimes I made you happy Sometimes I made you
blue
But love kept us together and I'm still here with you

No other arms no other lips no Other love beside me
No other star up above to guide me

Someday you'll go to heaven as all the angels do
I'll find my way to heaven and I'll be there with you

No other arms no other lips no other love but you
