After all this time
You're still feeding me that same old line
You don't know how you feel

You got a love inside
You got a love locked up way down deep inside
My mother taught me not to steal

Chorus:
I want to be with you
I want to be with you
I want to be with you . . .

Such a sorry sight
You holding on to the past with all your might
That ain't no way to live

Open up your eyes
Open up your eyes and take a look in mine
I got a love to give

Chorus

The only way for you to move on
Is just to let go, not to hold on
Baby I know you were hurt once
But that's all over, you found a new love

Chorus

I got a vibe on you
I feel alive on you
Can you feel it too?

Chorus
