Future's black as the world burns with the pigs  
In power are taking turns fucking you and feeding off  
Your flesh from the corners to the capitol  
We all have to voice it may not be the loudest  
But atleast we made a choice  
Its my fucking life don't make my choices for me  
The world should be in your hands  
But no one cares  
Calling, calling out the right  
G8 savage joining forces  
Allied empires rape resorces  
Economic superpowers  
Iron fists and ivory towers  
The world should be in your hands
