Dine upon this hatred  
Let the razors cut your stomach open  
Bleeding through your wedding dress  
My post-mortem beauty queen

Once your wings melted you descended  
Into the arms you saved  
Into the arms you saved  
To be raped  
We are the plague

You rose against the hand that fed you lies about this  
septic race

About its numbered days

Once your wings melted you descended  
Into the arms you saved  
Into the arms you saved  
To be raped  
We are the plague

To hate  
To be hated

Let your blackened heart lead the way to salvation
