

The Honesty "The Reason"

Visit "[The Reason](#)" on MotoLyrics.com

Days go by longer and time stands still
We were kids living in a new world such a vivid memory
Was it you? was it me?
Was I that young picking my own identity?

The ocean reflects the sun rays
Torments and misbehaves
A needle and thread let's seam
A dream we once had, you and me

It comes in clearer as you walk on by
You never gave a second chance to find a reason why
Was it you? was it me?
Was I that young picking my own identity?

The ocean reflects the sunrays
Torments and misbehaves
A needle and thread let's seam
A dream we once had, you and me

Stay where you are and we will find a way
It just might take some time
