"Butterflies"

Visit "[Butterflies](#)" on MotoLyrics.com

Go ahead and make a move
Don't be shy

Show me what you wanna do
Go ahead and try

I'ma stay right here all night
Me, my girls and I

Go ahead and make a move
Give me a try

With all these women on the floor
How can you decide

I know what you came here for
And imma get you right

I'ma stay and wait for you
I know what you like

Go ahead and make a move

All I know is that you're feeling me, feeling me
And I can see the way your eyes are all over me
All I know is that I wanna be, wanna be
The one who lights you fire

All I see is shadows in the light
Moving all around me, shining in the night
Giving me dancing butterflies
Playing all around me, feeling on the inside

Go ahead do what you do
Now we can't deny
Everybody in this room
Knows that we can't fight
I'ma show you how I do
Be a butterfly
I'ma dance all over you

All I know is that you're feeling me, feeling me

And I can see the way your eyes are all over me
All I know is that I wanna be, wanna be
The one who lights you fire

All I see is shadows in the light
Moving all around me, shining in the night
Giving me dancing butterflies
Playing all around me, feeling on the inside

All I see is shadows in the light
Moving all around me, shining in the night
Giving me dancing butterflies
Playing all around me, feeling on the inside

All I feel is butterflies,
dancing in the shadows
All we got is strobe lights,
moving to the energy
All I feel is butterflies,
dancing in the shadows.
All we got is strobe lights,
moving to the energy

All I see is shadows in the light
Moving all around me, shining in the night
Giving me dancing butterflies
Playing all around me, feeling on the inside

All I see is shadows in the light
Moving all around me, shining in the night
Giving me dancing butterflies
Playing all around me, feeling on the inside

All I feel is butterflies,
dancing in the shadows
All we got is strobe lights,
moving to the energy
All I feel is butterflies,
dancing in the shadows.
All we got is strobe lights,
moving to the energy
