Above Us All by The Indecision Alarm

Loss of memory and outrage  
Tactics and strategy  
Justified missiles and shell fire  
For those who question their desire

Above all above us all

Divide and conquer shatter us all  
False hopes and empty promises

Fill us up with lies and obstacles  
So we consume instead of uniting

Above all above us all  
Someday this empire will fall

We need to identify  
Why we all are so indifferent and pacified

Above all above us all
