And if you want to stop me from taking girls you know  
home  
I think you learned the hard way that portraying me like  
an early j dean  
And telling her what she should do is probably not the  
best for you

And I just made eye contact for a second nothing  
special kinda cute  
But I was wasted and the jam was hot so I would have  
been dancing  
And the chances of me and her only went up cause you

All the girls want me when they're told they can't have  
me and  
I said all the girls that want me they can have me  
And all the girls who know that they should move on  
and move out  
Are now the ones who didn't listen and they're back at  
my crib

Poke her and I smile as I walk by and kind a laugh  
because we know  
That she's been told to stay away and fed some stories  
But she thinks I'm funny, those were other girls and she  
ain't listening to you

Normally nice guys gonna come last but her friends  
told her my past  
I'm not so I just play it off and act like they all got me  
wrong  
But don't convince to hard to ruin the hours of work her  
friends put too
