I'm a waste of human skin  
That a better brain could go  
In a living pile of shit

Who gets sick at the thought of it  
My heart is slowly sinking into a hell  
That won't heal with drinking

Keep killing them when they start healing  
I'm a bastard with no heart  
And I think I've been fucked from the start  
Please take me away from this world  
At least just for one day  
Then I know the fear won't ever go away through  
With not being able to decide waiting for the day I  
finally die
