This is breaking news  
It appears air force one was shot down  
Somewhere over the Middle East this morning  
By a sleeper cell of rouge terrorists, firing a stinger  
missile  
The pilot and all passengers are unaccounted for  
The presidents whereabouts are presently unknown  
And he is presumed missing  
The vice president, secretary of state  
And principles of the military are assembling  
Our nation stands at DEFCON 3

The greatest crisis, will someone come for me?  
I "red, white and blew it."  
Unleashed revenge, my body is detained  
How could anybody do this?  
Betrayal, I peel away the days  
Medals are useless. Uncle Sam's forgotten me  
I'm not important no one will ever come  
I'll never be fund, god get me out of this hell.

Nuclear battlefields energised  
Cold wars are heating up again  
The tensions mounting  
People lift up your fists in revenge

The stage is set  
Who will be the first to blink?  
We can go to war  
Remember that "Vietnam thing"  
Peace at any price

With a gun to your head, bang, bang  
Weakness runs in your family

What runs in mine is death

[Solo - Poland]

This is your 5-minute warning  
Burn all your classified documents  
And if cooler heads don't prevail

First strike from a political dead man

Appeasement only makes the aggressor more  
aggressive

He understands only one language - action

And he respects only one word - force

No sign of them stopping, no time for back channel  
communiques

We need all the help we can get, air strikes and  
invasions!

Retaliate. I say!

The will of good men can not counter the terrible strain  
of war

[Solo - Poland]

[Solo - Mustaine]

Blackmail the universe with the greatest of calamities  
Awaken those sleeping giants in the dust of the ground  
With their skin destroyed, unjust to innocence  
Lawful possessor of the worlds last 24 hours

[Solo - Mustaine]

Terror and ugliness reveal what death really means  
And in hatred you see men as they really are  
If chosen over heaven, earth will have been for them  
All along, only another region of hell
