(Vocals - Mustaine)

Sentenced to work a dead end 9 to 5  
Trapped in a dingy corporate cubicle hell  
Then go to work in the darkness on the midnight shift  
Any chance you get, selling gas at the corner Shell

Three letters groups listening in on you  
Under surveillance courtesy of Big Brother in your car  
Drones monitor each and every move you make  
It doesn't matter who you know or who you think you  
are

You'll never see a ray of daylight  
So far in debt you're struggling to survive  
But you will break your back fighting and they'll help  
Before you let them break your pride

"Powers that be" will never win; a storm is coming, get  
ready  
You better learn to dance in the rain, instead of wait for  
the sun  
Learn to dance in the rain, the sun will never come

Solo - Dave

Down on your luck, you had your hand out once or twice  
But all you wanted was just a hand, they say  
"You have the right to remain silent", so shut your  
mouth  
Don't mention the broken promises and lies of hope  
and change

"Powers that be" will never win; a storm is coming, get  
ready  
You better learn to dance in the rain, instead of wait for  
the sun  
Learn to dance in the rain, the sun will never come

Solo - Chris

Never come, dance in the rain, it ain't gonna come

Solo - Dave

(Vocals - Draiman)

Enslave and impoverish the middle class  
Make them dependent then strip it all away  
Al-CIA-da, destruction, and democide  
Addiction, corruption, every word's a lie

(Vocals - Mustaine)

Races, classes, sexes, religious wars  
Destroy the family, and what love is for

(Vocals - Draiman)

The Fed and the Bankers own all the politicians  
May I introduce you to the sons of perdition?  
Replace the dictators Washington appointed  
The Devil Messiahs and the dangerously disappointed

Vocals - Mustaine/Draiman)

They lie to themselves, pleased with what they've done  
Soon they all will be repaid and there's nowhere to run
