At first I blenched
The collapsing star
Like ships tossed in storms
A collision of red dears

Eloquence and elixir
Things that won't fix us
We emended words spoken
And lost it all that night

Fragments of her, not here
And chemicals not interacting in a new compound
Come home, Tracy come home!
Come home, Tracy come home!

Eloquence and elixir
Things that won't fix us
We emended words spoken
And lost it all that night

[da da da interlude]

Eloquence and elixir
Things that won't fix us
We emended words spoken
And lost it all that night
