

The Lift "Surrounded"

Visit "[Surrounded](#)" on MotoLyrics.com

Think i'd like to to die
you're already dead
writing my goodbyes
those letters have been sent
i can picture me and you pushing daisies
they took you away
i never really left
hasn't been the same
i live inside your head
nothing left on earth to keep me from you
i wanna be around
we've got you surrounded
see you when you're sound asleep and dreaming
pretty sure i'm lost
you know where you are
how to get across
the bridge is in your heart
walk until the exit fog breathes you in
chorus
tell all the world that you feel light
tell them back home that you feel light
twisting in the pines
this temporary end
lying side by side
you'll always have a friend
i still picture me and you pushing daisies
