Kind of makes you tired
watching them perspire...sweat it out
who will be the giant?
leading the alliance...who'll get shot?
time to pick your battles
realize what matters...turn the cheek?
pick your favorite monkey
to worship like a junkie...herd the sheep
warning on the radio
from london on to tokyo
the march is on
this holy war parade
take our propaganda food
let religion think for you
nevermind there's money to be made
now we've got a purpose
an enemy to hurt us...get them first
now we've got a mission
erradicate dissension...before it gets worse
chorus
i've lost my, i've lost my, i've lost my interest
can't make me, invade me, can't take my voice yet
