Thank you god, thank you for the darkness
You live for just another day
You breathe for just another day
Nobody hears you when you pray
Nobody hears you and she's A-way
And your heart is broken
And nobody hears you
You're running out of life
And to die is easy
Cause nobody hears you
But you cannot leave her
She's your little suicide
She's your little suicide
You breathe for just another day
You love for just another day
This fuckin' world cannot erase
The pain you feel and she's Away
