We are the dark side of the earth  
We stop the world from turnin'  
We are the frozen past that hurts  
Because your Future's failing  
And you can't keep destroying (Feel the rain)  
We are the noise that you can't hear  
We are behind your eyes and  
We make the sculptures of the air  
With all your dreams and nightmares  
Because we hear your prayers (Feel the rain)  
And now you're alone there  
With all your sins and all the shame  
You're cryin'  
You're screamin'  
Save me save me!  
Vampires  
I wanna live like vampires  
I wanna give you my life  
And see through darkness with your eyes  
We are the light that you can't see  
But you can feel it's presence  
And you're so lost and you're so weak  
Because you feel the violence  
In every word you're sayin' (Feel the rain)  
We are the ones you used to hate  
Just cause we are not your slaves  
Your orders were like petals  
At the end your roses fade  
At the end your roses fade away!  
And now you're alone there  
With all your witches in your head  
They're dancing  
You're screaming  
Save me save me!...
