"Systems Failing"

What can you do, when the lights shining down on you
How would it show, if you thought this time they knew
Leaving it now, leaving it far behind
You wanna go
You gotta leave from the scene of the crime
Systems failing there's nothing anyone can do
So frustrating, who really wants to know the truth
It's never too late. to put on your brakes so loud
I'ts kinda letting them know
You'd taken enough, and weren't prepared to go
Systems failing there's nothing anyone can do
So deceiving, there could be a change and oh...
Oh, feeling better now, I can't feel no pain
Does anybody think that's strange. well
Oh better now, funny how things change
The first steps not so easy, but then your
Well over the line
What can you do, when the lights shining down on you
You gotta know, you gotta show that you know the rules
Systems failing there's nothing anyone can do
So deceiving, there could be a change and oh...
