That bug bit me, I'll admit Stunned - it took a while to hit  
But when it hit me, I was bit Shit, I came clean with it No  
match, who am I No match, who am I, so why try to  
deny it Just a regular guy, who won't even try it The  
bug's been around Since time began It's bitten bigger  
Badder bastards than the one I am It can cripple And it  
can paralyze When I felt it's tooth I told the truth to my  
surprise I saw the bug and I gotta say Ahh I tried to get  
away I tried to run, I tried to fight But the bug was there  
to bite No match, who am I? Must respect the insect, it  
injects and infects If i may interject, I love the effects  
The bug's been around since time began It's bitten  
bigger Badder bastards than the one I am It can  
cripple And it can paralyze When I felt its tooth I told  
the truth to my surprise
