We are the future people of tomorrow  
We are the future people of tomorrow  
We care about our world  
We stand for freedom, etc.  
We stand for freedom, etc.  
We and us man youth  
There is nothing you can do  
To stop the future people of tomorrow  
Tomorrow future people you and me  
Genocide is all we get  
From the fucking government  
They don't care what we've become  
All they want is opium in their masses  
Which sucks  
We fight oppressionism for the revolution  
We fight oppressionism for the revolution  
We might just bite you  
One united unity united for the people of tomorrow  
Tomorrow, future people you and me
