From the moment of our inception
Yeah we were destined to be together
Two planets on a cosmic collision
Yeah we're on a mission to last forever
It's like gravity took a hold of me and it's never letting
go
?Like attracted me to infinity
It's out of our control

*Chorus
And all of it's written in the stars
Already written in the stars
If I'm from Venus you're from Mars
All of it's written in the stars

I see ya made spells out in the sky
Lightin the night like a constellation
We touch go for a ride
The speed of light a supernova sensation
Your gravity took a hold of me
Don't ever let me go
Like attracted me to infinity
It's out of our control

Chorus

?I need ya for a scrip
I gotta keep it real
You keep me from burnin
Don't wanna drift away
Floatin in outer space
With no way of returnin

Chorus 2x

It's written in the stars
It's written in the stars
