"Low Radiation"

Visit "[Low Radiation](#)" on MotoLyrics.com

I curse this day while you take over my time
Not led astray, I hope you'll change your mind
To realize we're blinded by something you said
Are you tricked by your own lies?

Let's forget the mistakes we've made 'cause time is
passing by
Enjoy the rest of your time with me, it's free but worth
the price
We know we can hold on to all these things we had
Don't think, don't doubt, it's early, let's just give it a try

Don't follow me in this vacant mystery
Now can't you see there's no point in feeling down
So realize you shouldn't hide
Resist your mind and leave the rest behind

Let's forget the mistakes we've made 'cause time is
passing by
Enjoy the rest of your time with me, it's free but worth
the price
We know we can hold on to all these things we had
Don't think, don't doubt, it's early, let's just give it a try

Now you care cause now you see (Hold on)
And now you can if you really wanna make it
Now you care cause now you see (Hold on)
And now you can if you really wanna make it

Let's forget the mistakes we've made 'cause time is
passing by
Enjoy the rest of your time with me, it's free but worth
the price
We know we can hold on to all these things we had
Don't think, don't doubt, it's early, let's just give it a try
'Cause time's still passing by
