I wasted my time trying to reach your heart again  
This time I can remember...  
I made up my mind cause everything I've done  
Was wrong, with no excuses

My nightmare has finally come true  
Will someone wake me up?  
And In the end I'll go through  
These feelings I have  
Cause I do think I'm...

I'm breaking down  
Falling down with my mind  
Losing everything learnt from the time I spent with you  
No one is always right  
And I'm sorry I can't find the words to say that I've been  
so blind  
And I'm still searching for the answer  
I hope it's not too far

I'm wondering why  
I thought that you're perfect  
Right now I can realize that  
I tried million times  
But I am not able to forget  
You're still in my mind

I look at the sky but I feel  
I still miss my star  
And In the end I'll go through  
These feelings I have  
Cause I do think I'm...

Where's the light, I'm so blind  
Who can help me before it's too late?  
Cause I am....
