

The New Threat "Resurrect"

Visit "[Resurrect](#)" on MotoLyrics.com

What became of true anarchy NOT those patches I see
all around
You used to scream for a change, now you just veg. on
your couch

[Chorus:]

It's time to take a look around, bring back those times
just because
Get together stand and unify, there's nothing but good
times for you and I.

Whatever happened to "wild in the streets", Keith
Morris sang all about
The craziness that once ensued needs RESURRECTED
right now

When did you falter on what you believe, those values
you cared all about?
You used to scream for a change now you never open
your mouth

Taking it back, full on attack, we're taking it back right
now!
Taking it back, full on attack... it's time to scream and
shout!
