"Freeze"

Visit "[Freeze](#)" on MotoLyrics.com

Don't stir the coffee
Don't change the channel
Don't get a haircut
Don't tune the piano
Don't touch the dial
Don't tilt that smile
Don't make a move now
Not for a while

And I just want to stay right here
Inside your atmosphere
Your atmosphere

This is the most fun that I've had without laughing
I want to freeze it in a word
Before it all comes crashing down
And make it all stand still
But I know it never will
Don't push tomorrow I don't care what's gonna happen
Too mad about the way that time is always passing
people by
It's the same for you and I
So let's freeze this lullaby

Don't fold the laundry
Don't make the bed yet
Don't break the silence
Don't light a cigarette
Don't call your mother
Don't even bother
She knows we're good now
And we'll stick together

And I just want to stay right here
Inside your atmosphere
Your atmosphere

This is the most fun that I've had without laughing
I want to freeze it in a word
Before it all comes crashing down
And make it all stand still

But I know it never will
Don't push tomorrow I don't care what's gonna happen
Too mad about the way that time is always passing
people by
It's the same for you and I

You know when we're old and gray
I'll still feel like I do
Always trying to hold on to every day I have with you

This is the most fun that I've had without laughing
I want to freeze it in a word
Before it all comes crashing down
And make it all stand still
But I know it never will

This is the most fun that I've had without laughing
I want to freeze it in a word
Before it all comes crashing down
And make it all stand still
But I know it never will
We'll both be standing here when love goes out of
fashion
Too mad about the way that time is always passing
people by
It's the same for you and I
So let's freeze this lullaby
