

The Overprivileged "Internet Killed The Video Star"

Visit "[Internet Killed The Video Star](#)" on MotoLyrics.com

take back our sound, take back our money,
take back our scene from this corporate oligarchy
demand free music, reject the standards they impose,
download empeg layer three fuck musicians greed
right now is the time right now is the time,
they can't engage they can't enforce
right now is the time right now is the time,
right now they're working on something worse
an opportunity long suppressed by the industry,
have you bought into their culture of apathy
what we hold on our hard drives is pure revolution,
will you help destroy it or be part of the next evolution?
internet killed the video star, internet killed the video
star,
in my mind and in my car we can't reboot we've gone
too far
napster came and set you free*, put the blame on mp3,
* despite being corporate sellout bastards
