years ago church control encompassed the whole,
today it's the ceo's their power is total
executives hailed as new gods, use marketing tools to
rob us of our dignity,
convinced their products are necessity.
you're nothing, not anything, to me your money don't
mean a thing
power controls our economy, the senate's the hottest
commodity, can we as a society
make them realize their own hypocrisy
this vast oligarchy owns all from sea to sea freedom
dependant on bank statements
