Verse 1:

I made you cry
I turned away
It doesn't matter
What you say
And now you're not here
With me.

I lost my mind
I lost my way
No one knows
Why I don't think so
Cause I'm a little stressed
Tonight
I'll
Try,
Until I get back up.

Chorus:

I'll try
Till' it makes me wanna die
Waiting for the first kiss
Every single time.
You know why
The light has left
On the the corner
Of the side walk
And then...
The world had left
When I fell

Verse 2:

I was in the bottom
Of the hole
Of the guilt I left
That day I hurt you
I feel real sad
It's not your own fault
It's my temper

That made yell
But, I said

Chorus:

I'll try
Till' it makes me wanna die
Waiting for the first kiss
Every single time.
You know why
The light has left
On the the corner
Of the side walk
And then...
The world had left
When I fell

Verse 3: Bridge

But nobody knows
I've got you in my arms
I know that I've fell and gone
I've never got to
Say goodbye...

Chorus:

And I'll try
Till' it makes me wanna die
Waiting for the first kiss
Every single time.
You know why
The light has left
On the the corner
Of the side walk
And then...
The world had left
When I fell
And I know!

Bridge:

And I'll try
Till' it makes me wanna die
Waiting for the first kiss
Every single time.
You know why
The light has left
On the the corner
Of the side walk
And then...

The world had left
When I fell

I have to climb
My way out of the hole
That I dug out
With my voice
That screeched in your
Pretty face.
Who was I to make you sit

On the tar
Where no one
Knows where you are
You jeans getting all wet
With you in my arms
And I wanted to say...

Chorus:

I'll try
Till' it makes me wanna die
Waiting for the first kiss
Every single time.
You know why
The light has left
On the the corner
Of the side walk
And then...
The world had left
When I fell

I fell right through the cracks
I fell right through the cracks
I fell in right through the cracks...
