He don't look at her these days
The way that he used to
I bet he couldn't tell you If her eyes are green or blue
He takes it all for granted 'Cause he's seen it all before
She's still got it
He just don't get it anymore

She's still got it
From her head down to her feet
She's still got it
Any other man can see
She's still got it
How did he ever get bored
She's still got it

She still turns every head
Anywhere she goes
She's funny smart and beautiful
And everybody knows
She's everything a man could want
Except that fool next door
She's still got it
He just don't get it anymore
