Don't make me go  
Don't make me go  
Don't make me go home

Cos I'm not here to reflect you  
I wish your friends would leave me alone  
And I could never connect to  
The people I don't know from back home

This is an emergency

Please don't do it,  
Let's not do this now  
Somethings happening,  
Can't we stay somehow?

Cause I'm not here to reflect you  
I wish your friends would leave me alone  
And i could never connect to  
The people I don't know from back home

This is an emergency

Cause I'm not here to reflect you  
I wish your friends would leave me alone  
And I could never connect to  
The people I don't know from back home

This is an emergency
