"From The Heart Down"

Visit "[From The Heart Down](#)" on MotoLyrics.com

We Watch each other even when we sleep
For some small protection
It's a promise we keep
Love Is hard to define
It runs in circles round the mind
But a circle Ain't a circle
If it's not complete
Oh Love me from the heart down
If it hurts or if it's bliss
Love me from the heart down
Reveal me with a kiss
My senses must compete with a brain that lets me down
Down down We Satisfy each other but the hunger still remains
You sink into my flesh
Like a knife
When day comes to an end
We take off all our clothes
And stand naked
Face to face
With real life
Oh Love me from the heart down
Get me on the floor
Love me from the heart down
Go under and then come back for more
Analytical patter Gives love the run around
Around You can't hold a theory
Won't you love me
Love me from the heart down
We Misconstrue intentions
When there's distance in between
Longing hurts the teeth
Like something sweet
When You're not here with me
You become a memory
This aching feels like some kind Of defeat
Oh Love me from the heart down
Get me on the phone
Love me from the heart down
Lie and say you're Coming home
True confessions need the make-up
Of a clown
Smiles are deceiving
Won't you love me
Love me from the heart down
