"Locked And Loaded"

Visit "[Locked And Loaded](#)" on MotoLyrics.com

Influence is a fucking disease
We all are infected
No injection can save us
(this is a blasting zone)
We lose limbs in this space
That we've created
A timbomb in ourselves now
Tic-Tic pull this trigger it's all gone
Pull this trigger it's all gone
We make mistakes that aren't not mendable
Broken hearts forget forgiveness
The doors are opened
Will we walk through them?
Will you forget everything
You've been told and start to learn?
Place touch makes me I'll
I feel chills roll down my spine
With time this virus turns airborne
It enter tracheas, it infects these lungs
Each breath of you infects these lungs
I need a messiah to save me
Pull this trigger and you'll save me
These are the mistakes shattered
Not mendable
Gather the broken glass, label it in a jar
As leftovers of my heart
