Sometimes I long await tonight,
I wanna see my breath,
Under city light,
Just so you know,
There's no hard feelings here,
Just so you know,
I'll be missing you this year

[Chorus:]
Cuz all in all,
I hope you're doing fine,
Cuz over all,
The stars want to align
Just right for you,
Just right for you

Just so you know
There's a part of me that's yours
While the rest of me still wanders on this shore
(wanders on this shore)
The rhythm of the waves keeps me steady,
But steady isn't everything (I think I need more)

[Chorus]

I miss you.
I love you.
I'll be right there.

This city's just a place
And you will never be another name
Without a face.

[Chorus x2]

This city's just another place
It'll never be another name
Without a face
