

The Promise Hold "Hold On"

Visit "[Hold On](#)" on MotoLyrics.com

Your eyes don't shine as bright as, as before.
Your heart is lacking it's luster and you are feeling cold.
As you fight through the night you still are wanting more.
You have been wanting more direction.
Your hand is lost in the cold. it's getting harder.
You're losing hope. just hold on and make the most.
You're hoping you're praying will someone save you.
You're hoping you're praying will someone save you.
You have been wanting more direction.
Your hand is lost in the cold. it's getting harder.
You're losing hope. just hold on and make the most.
And you'll never look back on this again.
Give her the best before she says when.
And all of her thoughts are draining out.
Give her the best you'll find somehow. you're on your own.
